Technical Skills:

Currently Learning:

- C#
- Java

Languages:

- Typescript
- JavaScript

Backend:

- SQL, PSQL
- Data Seeding
- Data Migrations

Frontend:

- React
- NextJs
- TailwindCss
- Various UI Libraries

Operations:

- Docker
- Render
- SupaBase
- AWS
- Shell Scripting
- Linux Commands

Education:

Althaus Digital

Date: January 2024 – March 2024

Certification: C# Code Bootcamp

University of Wolverhampton

Date: September 2018 – 2023

Degree: Mechanical Engineering

Final Grade: 2:1

Languages:

- English – Fluent
- Farsi – Native

----- PERSONAL PROFILE -----

I am transitioning into software development, driven by a curiosity for all things revolving around technology. My background consists of mechanical engineering, sales and recruitment. While new to coding professionally, I've quickly gained proficiency through self-learning, hands-on projects and the skills I have gained through the Northcoders bootcamp. As shown through my development history below, I have applied my skills to a few different types of projects however, my real interest lies in backend development.

----- PROFESSIONAL DEVELOPMENT -----

Junior Software Developer | Northcoders Bootcamp | Jan 2025 – Apr 2025:

- Engaged in problem-solving tasks daily through pair programming, enhancing analytical and debugging skills.
- Built a range of projects to reinforce concepts from lectures, emphasising best practices such as Test-Driven Development (TDD).
- Gained comprehensive experience in full-stack development, covering back-end, front-end, and server operations.
- Currently deepening expertise in back-end technologies, focusing on Java and Spring Boot.

----- PROJECTS -----

NC News:

- A full-stack project about the Northcoders staff utilising the React frontend to make calls to a JavaScript backend API hosted on Render and SupaBase.
Backend: JavaScript, PSQL, Render, SupaBase
Frontend: React, TailwindCss, DaisyUI, GithubPages

InvestIQ:

- This project utilises real-time data gathered from Financial Modelling Preps API, to showcase the stock information on the top NASDAQ companies.
Tech Stack: React, TypeScript, TailwindCss, DaisyUI

Janes Photography:

- A website for a freelancing wedding photographer, showcasing her best work and a contact form for clients to reach out with specific enquiries.
Tech Stack: React, Typescript, TailwindCss, ShadcnUI

----- EMPLOYMENT HISTORY -----

Hospitality Bank Work | Blank Street / Cosy Club | Nov 2023 – Jan 2025

- Part-time hospitality staff whilst I continue my software development studies.

Logistics Team Member | Rightio | Jan 2023 to Nov 2023

- Dealing with inbound customer calls relating to home maintenance enquiries and ensuring empathetic customer care.
- Coaching new colleagues on the in-house CRM system and the customer care protocols.
- Promoting the company's brand values by providing excellent customer care.

Bartender | Wetherspoons, Figure of Eight | July 2020 – Dec 2022

- Working the peak shifts on delivering high standard customer service in hospitality.

Recruitment Consultant | Joshua Robert Recruitment | Jan 2022 to Dec 2022

- Recruitment Consultant in the soft facilities management sector, I managed my portfolio of clients to place them in the public soft facilities sector.
- Consistently achieving my KPI targets of 20 new candidates per week through prioritisation of tasks to meet various deadlines.
- Organising weekly meetings regarding my status on my client base and future projections.
- Employing the use of Bullhorn and Microsoft Office tools to organise my client base.

Account & Finance Manager / Recruitment | Core Selection | Jan 2021 to Jan 2022

- Being adaptable whilst the company went through branding from a gateway provider for the Kickstart Scheme and then transitioning into a recruitment company.
- Brokering relationships between external stakeholders and candidates.
- Utilising Sage 50 and Excel to assist the Finance Manager's transactions by cross-referencing and organising them into the appropriate sectors.
- Acquiring new clients and candidates following the company's rebrand to a recruitment agency.

Team Member | Tim Hortons | Mar 2018 to Dec 2020

- Part-time hospitality role whilst I was studying mechanical engineering at the University of Wolverhampton.

Interests & Hobbies:

- I have competed in Muay Thai and trained for the past 3 years to keep my mind and body healthy.
- In the little spare time I have since starting my programming journey, I have started creating a game as a side hobby with one of my friends using C# in Godot.
